

# SUCCESS STORY

## TURNKEY® Rhino - TKN15 15100 PE / TK WH 50

**Location** : Sumatra Island - INDONESIA  
**Materials extracted** : Coal Mining / Over Burden  
**Machine** : Excavator CAT 6015 B (110Y)

### OBJECTIVES

Our mining customer was looking for a system with a longer lifetime to equip his excavators working in coal extraction, as he couldn't find satisfaction in all the current offerings. That's why our Design & Methods Dep. drew a bucket drawing and suggested to equip with TURNKEY® Rhino size 15 with pick tooth shape.

### “ RESULTS

*With the TURNKEY® Rhino range, we are very pleased because your system is more hard wearing compared to the competitor. The teeth last twice.*

- Replacement : **267 hour's lifetime (still running)**

The customer reaffirms his trust by asking us to quote for a bigger machine for a 190 T excavator “ Hitachi EX1900.
