

SUCCESS STORY

TURNKEY® Grizzly - T8 1545 PR

Location : East of France

Customer : Chaudronnerie Sauvage

Bucket : Demolition bucket

” OBJECTIVES

The customer was looking for an innovative and safe system for breaking materials at elevated heights. As an alternative to the ripper tooth, the customer chose this type of 2-teeth bucket.

The PR shape has a good tooth profile, which ensures a strong penetration. This shape is an excellent compromise between wear material and penetration.
