

SUCCESS STORY CONSTRUCTION

TURNKEY® Grizzly - 5 x T8 1545 10° S

- Centre-Val de Loire - France
- Lamy les Constructeurs
- LIEBHERR R926 Excavator - 29T

CUSTOMER'S OBJECTIVES

Our customer needed to equip a selection of LIEBHERR machines for the LIEBHERR France network. He wanted to standardise his equipment by choosing a single G.E.T. manufacturer, based on the following criteria: better soil penetration, quick and easy assembly and disassembly, bucket loading optimization, precision and ease of operations...

We already have equipped 5 buckets, mainly in a quarry in Brittany for granite extraction and in Occitanie for earthworks.

With their thicker upper legs, abrasion adapters offer optimum abrasion resistance. Moreover, the standard S shape has an ideal profile for earthworks, as well as good penetration and abrasion resistance.
